

Concluding Remarks

- ISAS has selected LiteBIRD for the next strategic large-class mission of JAXA (after MMX).
- LiteBIRD is the only CMB space mission which can be realized in 2020s.
- LiteBIRD is based on the extensive international collaboration with NASA, Europe, ESA, and CSA.
- A very strong international team already exists and is working hard to realize LiteBIRD.

Full Success :

- $\delta r < 1 \times 10^{-3}$ (for $r=0$)
- $>5\sigma$ observation for each bump (for $r \geq 0.01$)

Your continuous support is very appreciated.
